Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Regarding Claims 2, 8, 17 and 28 prior art fails to show alone or in combination that in response to an occurrence of a network initiated data session (NIDS) for a mobile station (MS), an authentication, Authorization and Accounting server (AAA) is queried to obtain at least the current location of the MS. The closest prior art Madour et al, U.S. Publication No. 2001/0050907, Chowdhury et al, U.S. Publication No. 2004/0022212, Sayeedi, U.S. Publication No. 2003/0129980 and the admitted prior art teach that a base station (BS) receiving a message indicating a current location of the MS and that the MS is in an idle state and triggering further messages from the BS to a packet control function (PCF), then to a packet data serving node (PDSN), then to an AAA, which stores the information indicating the current of the MS. However, the prior fail to disclose or render obvious the above limitations as claimed.

Art Unit: 2416

Regarding Claims 3-7, 9-16, 18-22, 29-30 and 32, they are allowable because they are claims depending on the allowable independent claims.
